By 30th September 2012 to go into the draw to win.

Proudly Supporting:

ANZFSS Forensics Conference
23-27 Sept. 12, Hobart

APIA Pipeliner Convention
13-16 Oct. 12, Brisbane

AFI Conference
21-25 Oct. 12, Sydney

Corrosion Conference
11-14 Nov. 12, Melbourne

AINDT Seminar
14-15 Nov. 12, Sydney

COMPACT UV-A TORCH

Spectronics Corporation has introduced the budget-priced, compact OPTI-LUX™ 365 Series UV-A (365 nm) LED torches, ideal for NDT inspection. We are happy to announce that we have stock of the standard intensity torch, with internal black light filter (OLX-365BFL) ready for immediate dispatch. The high-intensity model (OLX-365B) is also coming soon.

OPTI-LUX 365 torches meet ASTM UV-A wavelength and intensity specifications & Australian standards for MPI & DP. They come complete with a certificate of compliance for wavelength

and output measurements. The standard-intensity models produce a maximum UV-A intensity of 4,500 $\mu\text{W}/\text{cm}^2$ to address aerospace industry concerns. The high-intensity versions produce a nominal steady-state UV-A intensity of 10,000 $\mu\text{W}/\text{cm}^2$ at 38 cm.

The OPTI-LUX 365 is extremely compact and lightweight, reducing user fatigue. It provides a steady beam profile that surpasses those of more expensive lamps. The anodized aluminum lamp body minimizes corrosion and with-stands heavy use in the field. Its "instant-on"

operation means no warm-up time is required to reach full UV-A intensity.

PROPOSED ACFM TRAINING

Venue: Sydney

LEVEL 1: 3rd-7th December 2012

LEVEL 2: 10th-14th December 2012

Contact Ashleigh ASAP to register your interest.

BLAST FROM THE PAST

This article first appeared in Russell Fraser Sales newsletter issue 2 - 2003.

BUCKLEYS BATHYCORROMETER

Buckleys manufacture a range of equipment and ancillary items used for sub-sea corrosion monitoring applications.

The Bathycorrometer is a diver hand-held unit that will measure the corrosion potential at contact points on sub-sea steel structures. This allows a corrosion survey of the structure to be carried out easily. A Surface Display Unit is available to enable the voltage readings to be verified on board a ship or diving platform.

If the work is being carried out by Remotely Operated Vehicles (ROVs), either the UCP1A Contact Probe or the UCP1B Proximity Probes can be used in place of the Bathycorrometer.

TOP NDT PICKS

3-D PIPECHECK SCANNER

Creaform's 3-D Pipecheck system offers scanning speed which is more than 10 times faster than the conventional pit gauge technique, and data can be verified in real time.

See it at the APIA Conference, Brisbane.

MAINS-FREE AC YOKE

UK made JAY-PAC and JAYSON-PAC mains-free AC yoke kits provide, for the first time, a fully self contained AC Field output; offering an excellent "skin effect" which outperforms existing DC portable units in defect detection.

[Get More Info](#)

BOSS BRINELL SYSTEM

The B.O.S.S. system from Newage Testing Instruments is an automatic scanning system for measuring Brinell impressions.

See it at the AFI Conference, Sydney.

ARTICULATING BORESCOPIES

The Panricho Articulated Borescope captures still & movie files & features a detachable 1 or 2 metre 270° articulated cable. The cable is fast & inexpensive to service compared to those with an integrated cable.

HEATHER'S COLUMN

Many of you I have probably spoken to on the phone at some stage over the years with Account or Repair problems. I have been at RFS for so long I think I'm part of the furniture and when we recently made our big move to new premises I was worried they would be packing me into the truck. As I have been with the Company for many years I recently took seven weeks Long Service Leave.

My Husband and I left our family to fend for themselves and we headed off on our 30th Wedding Anniversary trip to England, Scotland, Paris, Hong Kong and Singapore. It was the trip of a lifetime. A highlight was seeing the Queen at the Diamond Jubilee Pageant and watching over a thousand boats sail up The Thames. It was an amazing experience and a piece of history.

At RFS we are all now settling into our bigger and improved premises just up the road from our old factory so if you get a chance please pop in and say hello, we would love to show you around.

Thanks for reading RFS NEWS, bye for now.

Heather & the team at RFS

RFS HAS MOVED!

Just 400m up the road to unit 7/38 Waratah Street, Kirrawee, NSW, 2232.
