

MAINTAINING YOUR EQUOTIP PICCOLO/ BAMBINO 2 HARDNESS TESTER

Does the grip end of the impact body look rounded and worn?

Yes

No

Rounding of grip end of impact body causes failure to pick-up or poor, intermittent firing action.

Is the impact body face worn?

Yes

No

Worn impact body face manifests itself by high readings of certified test block.

Is the support ring tightly secured?

Yes

No

Loose support rings can generate incorrect readings.

Is the impact device running smoothly?

Yes

No

Use supplied brush to keep internals free from dirt.

Is the battery charged?

Yes

No

Ensure battery remains charged to avoid permanent battery damage. Charge every 2-3 months if not in use.

Like to reboot or obtain model name/serial number?

Yes

No

Press all 3 buttons simultaneously.
