

ISOMARK THIXOTROPIC COMPOUNDS

ISOMARK GRADE / (PART NUMBER)	DESCRIPTION AND KEY FEATURES	WORKING LIFE @ 25°C	CURING TIME @ 25°C
T-1 GREY (T-1G) Also available in WHITE (T-1 WHITE)	Fast curing compound. Ideal for cold conditions and when used with backing paper. Specially formulated to give optimum contrast characteristics for comparator microscopy.	30 seconds	2-3 mins.
T-2 GREY (T-2G) Also available in WHITE (T-2 WHITE)	Slower curing version of T1 Grey. Suitable for ambient temperatures above 20°C	3 mins.	10 mins.
T-1 BLACK (T-1B)	Fast curing compound. Ideal for cold conditions and when used with backing paper. Specially formulated for high magnification optical microscopy with incident illumination.	1 min.	5 mins.
T-2 BLACK (T-2B)	Slower curing version of T1 Black. Suitable for ambient temperatures above 20°C	3 mins.	10 mins.
